Why High-Performing Bid Teams Rely On CheckMate

Zero Missed Mandatory Clauses

Human reviewers get fatigued on page 70 of dense legal tenders. CheckMate's deterministic heuristics extract 100% of "shall", "must", "required", Annexures, Lot numbers, and numerical thresholds automatically.

-
- ✓ Extracts exact turnover & eligibility limits
 - ✓ Identifies missing Annexure attachments
 - ✓ Flags conflicting technical specifications

Page-Level Audit Trail

Never guess where a compliance verification came from. CheckMate provides exact page and paragraph references linking both the RFP clause and the candidate submission document side-by-side.

-
- ✓ Dual-view Narrated & Technical logs
 - ✓ One-click HTML & PDF audit reports

- ✓ **Instant proof for evaluation committees**

100% Offline Pre-Flight & Privacy

Your confidential pricing and technical proposals stay on your Mac. CheckMate runs local OCR and table parsing inside a self-contained DMG bundle without dumping raw files into public web browsers.

-
- ✓ **Self-contained 143 MB macOS bundle**
 - ✓ **Zero cloud storage or document retention**
 - ✓ **Enterprise-grade data sovereignty**

TECHNICAL SUPERIORITY

Engineered For Maximum Accuracy & Token Efficiency

HYBRID AI ARCHITECTURE

Deterministic + Semantic Engine

Generic LLMs struggle with exact math and hard rules. CheckMate uses local deterministic heuristics for exact threshold verification and passes only complex semantic requirements to Gemini 3 Pro.

```
compliance_engine.py → TF-IDF Vector Pre-Filter + Cosine Ranking
```

SMART TABLE ENGINE

Native & Scanned OCR Reconstruction

Most AI wrappers drop tabular formatting and fail on scanned PDFs. CheckMate automatically detects image-based pages and runs local optical character recognition while preserving table structure.

```
pdf_extractor.py → pypdfium2 + pytesseract + Layout Preservation
```

MULTI-FOLDER INDEXING

Recursive Submission Folder Scanning

RFPs aren't evaluated against one file—they require checking dozens of attachments. CheckMate scans entire directories (`.pdf`, `.docx`, `.xlsx`, `.png`) to cross-reference every candidate document simultaneously.

Extracts 14+ submission files → Builds unified searchable index

DYNAMIC MODEL ROUTING

Cost-Aware Model Selection

CheckMate inspects document complexity and automatically recommends ultra-fast models (`Gemini 3.5 Flash-Lite`) for checklists and deep reasoning models (`Gemini 3.1 Pro`) for complex multi-lot evaluations.

Dynamic allocation → Saves up to 85% in API token charges

THE COST BENEFIT

Interactive ROI & Cost Savings Calculator

Annual RFPs & Tenders Submitted

40 Tenders/yr

Average RFP Size (Pages)

80 Pages

Bid Team Specialist Hourly Rate

\$120 / hr

*Calculation based on industry benchmarks: Manual compliance matrix review requires ~0.5 hours per RFP page. CheckMate completes full multi-document verification in 3 minutes with local TF-IDF token reduction.

ANNUAL FINANCIAL & TIME IMPACT

Time & Cost Recovered

\$191,952

CheckMate vs. Generic AI & Traditional Software

Critical Enterprise Capability	CheckMate AI Studio	ChatGPT / Claude Web Wrappers	Legacy Bid Management Tools
Page-Exact Audit Citations	✓ Exact Page & Para #	✗ Frequent Hallucinations	✗ Manual Data Entry Only
Scanned PDF & Tabular OCR	✓ Native Tesseract & Table Engine	⚠ Drops Table Formatting	✗ No Optical Recognition
Token Efficiency & API Cost	✓ Local Pre-Filtering (~85% Cost)	✗ Massive Context Dump (\$20-\$50)	N/A High Software Licensing Fees
Multi-Folder Submission Scanning	✓ Recursive Folder Cross-Match	✗ Strict File Upload Limits	✗ One-by-One Manual Upload
Data Sovereignty & Offline Pre-flight	✓ 100% Local macOS Execution	✗ Cloud Storage & Retention Risk	⚠ Cloud-Only / Vendor Locked
Mandatory Clause Heuristics	✓ Dedicated "Shall/Must" Engine	✗ Treats All Text Equally	⚠ Basic Keyword Search Only

Uncompromising Accuracy For High-Stakes Tenders

CheckMate eliminates the false negatives that cause bid disqualification. Our deterministic engine ensures every single mandatory compliance criteria is captured, verified, and backed by auditable evidence.
